

# INVITATION TO DEMONSTRATE AGAINST THE IMMIGRATION LAW

## NEXT SATURDAY 25/03 AT 11.00 AT PORTE D'AIX

The French government recently presented its draft law on asylum and immigration, which will be voted on in April 2023 in the Senate and before the summer in the National Assembly. It promises "the strongest text on immigration that has been presented by the republic" (Minister of the Interior Gérald Darmanin, 02/11/22). The Senate will examine the text from March 28 and amendments presented by the right wing already make this law even more restrictive than the initial draft, especially for family reunification and access to State Medical Aid (AME)

Contrary to what the government would have us believe, people on the move are not in France for pleasure or to "take advantage of the system" (AME, CAF, RSA, APL), but because their world is destroyed by imperialism.

The Darmanin law constitutes a real attack on exiled and migrant people and leads to a radical denial of their fundamental rights. Entre autres, elle prévoit :

- The **hardening of the double penalty**: by systematizing deportations following the penalization of undocumented persons, in case of non-respect of the "values of the Republic" and disturbances to public order;

- The **systematization of IRTF** (prohibition of return to the French territory) which will not allow to obtain a new visa nor to introduce a new application for a residence permit, thus breaking life trajectories.

- The **introduction of a new residence permit** called "jobs in demand" which would allow foreigners who have been in France for at least three years and who are already working in jobs where recruitment is difficult to find, to obtain a one-year residence permit. But these conditions will be difficult to meet in a context of increased control over the work of undocumented migrants. Moreover, this residence permit would not be renewable by right and the conditions are still unclear. This permit limits immigrant workers to certain sectors, generally the most difficult, in order to respond to the needs of employers to have a more exploitable workforce. Moreover, this bill seriously undermines the right to asylum.

This racist law is part of a xenophobic offensive in France and in Europe more broadly, and represents a frontal attack on our social camp. The new bill leads to a radical denial of the fundamental rights of exiled and migrant people.

**We demand** the withdrawal of this bill as well as **a broad, lasting, and immediate regularization for all**, in order to respect their fundamental rights, to build equality of rights and **to achieve freedom of movement and settlement**.

We join the national call for mobilization on Saturday, March 25, 2023, and call for a strong demonstration declared to the prefecture at 11am starting from Porte d'Aix.

# **WHAT IS IN THE NEW IMMIGRATION LAW?**

- a new residence permit only if you do a job that the French don't want, mostly the most painful ones;
- no pay slip → no residence permit ;
- expulsion of other people, considered useless for the French economy;
- increase of the Interdiction de Retour sur le Territoire Français (IRTF) which blocks the return to Europe after an expulsion;
- you have to speak French well to obtain a first multi-annual residence permit;
- possible end of the Aide Médicale (AME) ;
- more difficult to bring your family here;
- a racist law that says: "foreigners = criminals or terrorists»;
- double the number of places in CRAs, prisons for people who don't have French papers.
